HEALTH BENEFITS

Avocados are very high in essential vitamins and minerals, including fiber, vitamins K, B5, B6, and C, folate, and potassium.

One avocado can have twice the potassium of a banana, which helps balance your potassium to sodium ratio.

Avocados have very little sodium, and are low in fructose.

It is one of the few fruits that will provide you with "good" monounsaturated fats. A medium Hass avocado contains about 22.5 grams of fat.

Eating avocados helps maintain cholesterol levels already in the healthy range and lower your risk for heart disease.

It enables your body to more efficiently absorb fat-soluble nutrients, such as alpha- and beta-carotene and lutein, in other foods eaten in conjunction.

FUN FACTS

43%
About 43% of US households buy avocados.

This fruit ripens quicker when placed beside a banana or an apple.

Avocados were once a luxury food reserved for the tables of royalty, but are now enjoyed around the world by people from all walks of life.

To find out if an avocado is ripe, look under the dry little spot on the stem end. If it's green, the avocado is perfectly ripe. If it's brown, the fruit is overripe.

Avocados rank among the lowest of all fruits and vegetables for pesticide use. Their thick skin also protects the inner fruit from pesticides and the need to purchase organic varieties for protection from pesticides.
